Lower School Science Fair!

Swoosh!

Cole Sapphire from Ms. Veronica's Class proudly displays his volcanic model of Olympus Mons. Do you know what planet he is on?

On Friday, January 18th, the Lower School students presented their knowledge and hard work in Science. Some students had individual projects ranging from volcanoes to lemon acid batteries, some worked in teams on the different life cycles, and the preschoolers all worked together on a big "Sink or Float?" project. The projects were amazing and the students were very knowledgeable. Well done, Lower School!

Rabel Demissie holds her breath while Ashley Hancock makes a free-throw with perfect form against the girls at Thatcher!

It's basketball season and the girls opened with a win against Thatcher Montessori! Our girls team only has five players. That's right, that means they are on the court the whole time with no substitutions!

Both the boys and the girls have a full schedule this year and we will keep you posted on their Dragon ferocity!

Form Completions!

This year has become one of our most productive school years ever. The number of Form completions is staggering. Our Standards team, **Katie Campbell** and **Chelsey Reckis**, work tirelessly to make sure that each student walks out of an examination with full understanding and the ability to use what they have learned. No short cuts, no holes - just competence!

Shaylan Chawda proudly wears his medal for finishing Form 1.

"Morale is boosted to high highs by accomplishment. In fact, it can be demonstrated that production is the basis of morale."

L. Ron Hubbard, *The Way to Happiness*

WELCOME NEW STUDENTS

**CONNOR CHAPLIN
MANASVI CHILAKAPATI
NANDINI CHILAKAPATI**

Time to Consider Summer!

It's that time of year again. While you shiver in front of your space heater, we are planning seven weeks of spectacular summer fun and learning.

Discounts are available for returning campers who sign up by March 1st. Contact Jeff Rouelle today!
