ES-MS Sports!

Orvin Pierre on a jump shot over Saint Mary's defense.

Myles Parker making his move against Thatcher.

Soccer and Basketball in the Elementary and Middle School have been very popular this season. The soccer season has come to an end but basketball has many games left.

Despite the size, age and experience difference between the Delphi Dragons and most of the other schools we play, our enthusiasm, determination and team spirit make every game worth it.

Thank you Ms. Diana and Greg Hancock for making it all possible.

Open House Sunday, December 15th!

Spaces available for all levels for this school year.

Second Preschool opening in January.
10 seats available for 2.9 - 3.5 year-olds

Send your referrals to Mary Parker

Study Technology Workshop

Workshop attendees proudly display their certificates.

This year's workshop was a hit! On Saturday, November 2nd, workshop attendees received first-hand experience with Study Technology.

The workshop covered everything from the physical manifestations of improper study to how to help children become successful and self-reliant.

"[From this] workshop I realized for the first time, I defined words by contexts. It was my downfall! I was bored and hated text books. I bought a simple dictionary and returned the best grades in my master degree and EMT course since college. In fact, I love to read my assignments now. Who knew?"

This year was a refresher on how to deal with my children. Beautiful children, but at times can be trying. The workshop reminded that the rod is not an option and that there are many other alternatives.

What I have implemented in the house so far, is to let them own their possessions. They love it."

-Delphi Parent

WELCOME NEW STUDENTS

Professional Development

Chris Garrison working with **Chandra Singaram** in our Staff Academy for Professional Development.

At Delphi Academy we use the educational technologies developed by American author and humanitarian, L. Ron Hubbard. This method of education is known as Study Technology.

Additionally, Delphi uses it's own curriculum, which has been developed and in use for over 35 years.

To clarify the difference between the two is simple: the Delphi curriculum is *what* we teach, the Study Technology is *how* we teach.

To ensure our teachers and staff are thoroughly proficient and effective in using this method and the curriculum, professional development occurs daily for an hour or more for every staff member.

Overseeing all of this is, Chris Garrison or "Big Chris," as the students say. Chris trains all staff on becoming experts in Study Technology and specialists for their specific areas, regardless of their teacher's degree or experience,

Through this, we can keep your child's learning experience consistent at each level, and keep all of our staff accountable for student performance.

This is yet another way we at Delphi take that extra step to ensure your child gets the best education possible.

FORM COMPLETIONS

Since October

Beginner 1

Annabelle Texas

Form 2

Lily Campbell

Form 3

Korey Sam
